 [/asif-ahemmed](https://www.linkedin.com/in/asif-ahemmed/)

### SKILLS

- ❖ **Core :** HTML5, CSS3, JavaScript(ES6+), Typescript
- ❖ **Frontend :** React.js, Next.js, Context API, Zustand, Tailwind CSS
- ❖ **Backend :** Node.js, Express.js, RESTful APIs, MongoDB, Mongoose, JWT Authentication
- ❖ **Tools :** Git & GitHub, npm, Vite, ESLint, Prettier, VS Code, Figma
- ❖ **Deployment :** Vercel, Netlify, Render

### EDUCATION

- ❖ **Southeast University** (2022 - Present)  
Dhaka, Bangladesh  
B.Sc in Computer Science and Engineering

### EXPERIENCE

- ❖ Built responsive frontend and MERN stack applications using React.js, JavaScript, Node.js, and MongoDB
- ❖ Implemented authentication, API integration, and state management
- ❖ Deployed projects using Vercel and managed source code with GitHub

### PROJECTS

- ❖ **Full-Stack E-Commerce Platform** [GitHub](#) | [Live Link](#)  
**Technologies :** Next.js 15, React 19, TypeScript, MongoDB, Mongoose, Tailwind CSS, shadcn-ui, zustand, Auth.js, Stripe, UploadThing, Recharts, React Hook Form, Zod

#### Features :

- Implemented **secure authentication and role-based access control**
- Built **product catalog with advanced search, filtering, and category navigation**
- Integrated **Stripe payment gateways** with order confirmation and invoice generation
- Designed and built an **admin dashboard** for managing products, orders, users, and categories

- ❖ **TeamSync — B2B Project Management Platform** [GitHub](#) | [Live Link](#)  
**Technologies :** React 18, TypeScript, Tailwind CSS, shadcn/ui, React Router DOM v6, TanStack Query, Zustand, React Hook Form, Zod, Node.js, Express.js, MongoDB, Mongoose, Passport.js, Google OAuth 2.0, Bcrypt

#### Features :

- Designed a **multi-tenant workspace architecture** enabling secure collaboration across organizations with strict data isolation
- Implemented **robust authentication and role-based authorization (RBAC)** using Google OAuth 2.0 and Passport.js to manage Owner, Admin, and Member access
- Built a **project and task management system** with end-to-end task lifecycle tracking, advanced filtering, and URL-based state management
- Developed a **scalable full-stack application** with optimized API communication, efficient server-state management, and production-ready deployments
